

Raffle #2: **Portable Temperature Alert Pager**
Tickets \$5 each or 4 for \$20

INTRODUCTORY PRICING

Portable temperature pager with 12 volt and 120 volt adapters: \$350.00

Temperature Pager alert systems are worthless when you can't afford one. THAT HAS CHANGED. Not only is this very affordable at one third our competition's price, it is smaller, lighter, more portable, easier to use and requires no electrical work. If you can plug in your cell phone chargers, you can use this unit! It weighs less than one pound. It has a ½ mile range with an out-of-range indicator. It has two separate paging signals, one for temperature and a manual switch to signal the pagers. Additional pagers are available for \$80. It stores your temperature setting even when unplugged. The digital display is an LED so you can see it in the dark. Optional rechargeable battery pack (4 day continuous run time!) with additional charger is available for \$60, so you can even use this while camping. Remember, this unit has no monthly fees like some systems.

This unit is completely portable at under six inches wide. It could even fit in a purse! Put it in your van for this weekend's show. Move it to your RV for next weekend's show. Use in the van while you run into Wal-Mart. Put in your friend's van for carpooling the week after. And between them put it in your kennel building for peace of mind. Aren't your dogs worth it, aren't they like family?

It can also be permanently installed. It can be customized for your particular needs at a reasonable price. I've been permanently installing this unit in dog show vans for years. It's reliable and affordable. Accidents happen, at this price don't let that happen to you.

NOTE: After the introductory period, the price will be going up, so buy today!

If you don't "win" the raffle unit, you may still get one of your own, call:
